Using the “VLOOKUP” Function Across Worksheets

TOTAL POINTS 2

1. 1 / 1 point

	A	B	C	D	E	F	G	H
1	**Item**	**Quantity**	**Price Lookup**					
2	Strawberry	12	=VLOOKUP(A2,'Sheet 2'!$A$2:$B$6,2,FALSE)					
3	Banana	2						
4	Peach	1						
5	Orange Juice (8oz)	1						
6	Ice (1 small bag)	1						
7								

VLOOKUP(lookup_value, table_array, col_index_num, [range_lookup])

Recipe | Item Pricing

	A	B	C
1	**Item**	**Price**	
2	Banana	$0.45	
3	Ice (1 small bag)	$0.50	
4	Orange Juice (8oz)	$1.75	
5	Peach	$1.05	
6	Strawberry	$0.10	
7			

Recipe | Item Pricing

The VLOOKUP function above is intended to return the price from the second worksheet, but it has been incorrectly entered. To fix it, ‘Sheet 2’ should be replaced by:

- ‘Sheet 1’
- ‘Sheet_2’
- ‘Recipe’
- ‘Item Pricing’

✓ **Correct**

2. Once the function above is corrected, what value will it return? 1 / 1 point

0.10

✓ **Correct**

Data Filtering in Excel

TOTAL POINTS 2

1. Based on the dropdown symbol, which of the following has some sort of filtering applied? Select all that apply.

1 / 1 point

- [ ]

	A
1	Animal
2	Dog
3	Cat
4	Mouse
5	Horse

- [x]

	A
1	Animal
2	Dog
3	Cat
4	Mouse
5	Horse

✓ **Correct**

- [x]

	A
1	Animal
2	Cat
3	Cat
4	Cat
5	Cow

✓ **Correct**

- [ ] None of the above

2.

1 / 1 point

	A	B
1	Animal	
4	Mouse	
19	Mouse	
30	Mouse	
38	Mouse	
40	Mouse	
45	Mouse	
46		
47		
48		
49		

The column above is filtered to only show "Mouse" entries. If the column were NOT filtered, how many total Animal entries would there be? Hint: Don't forget that the heading row does not count as an entry.

44

Correct

Use of Pivot Tables in Excel

TOTAL POINTS 2

1.

1 / 1 point

Row Labels
1976
1980
1984
1988
1992
1996
2000
2004
2008
Grand Total

To set up a Pivot Table with years listed vertically as shown above, the Year field should be dragged into the following Pivot Area:

- FILTERS
- COLUMNS
- ROWS
- VALUES

2.

1 / 1 point

Column Labels									
1976	1980	1984	1988	1992	1996	2000	2004	2008	Grand Total

To set up a Pivot Table with years listed horizontally as shown above, the Year field should be dragged into the following Pivot Area:

- FILTERS
- COLUMNS
- ROWS
- VALUES

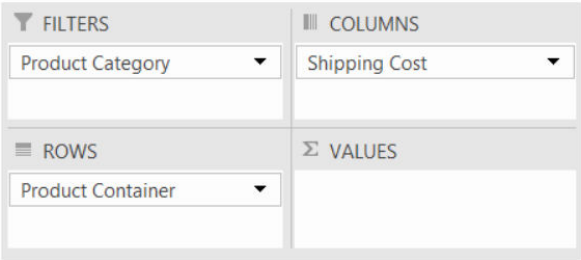
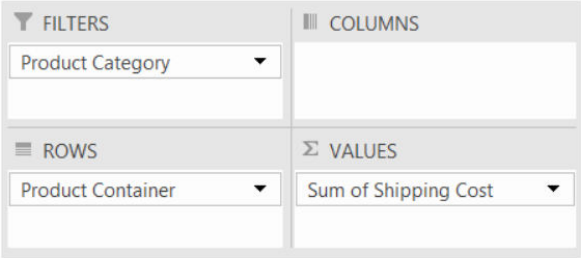
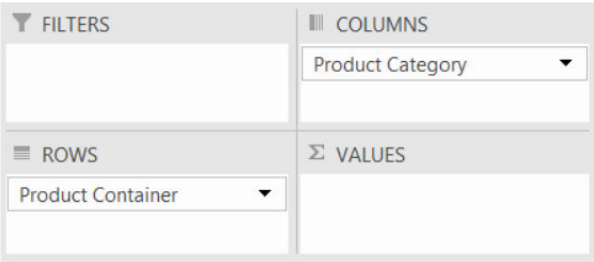
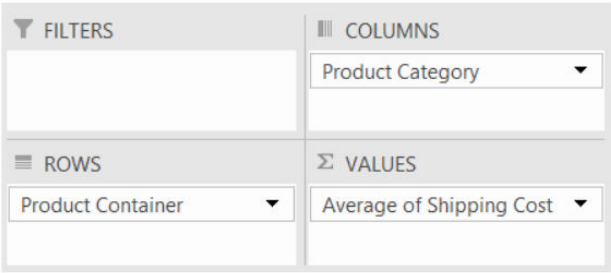
Which of the following would have created the Pivot Table above?









Correct

2. Which of the following is true about Pivot Tables? Select all that apply.

1 / 1 point

- [x] Dates in a Pivot Table can be grouped by years, quarters, months, days, hours, minutes, and seconds.

Correct

- [x] Pivot Tables automatically calculate grand totals of rows and columns.

Correct

- [ ] Editing a Pivot Table will impact the original data source.
- [x] Pivot Tables can be filtered by multiple columns.

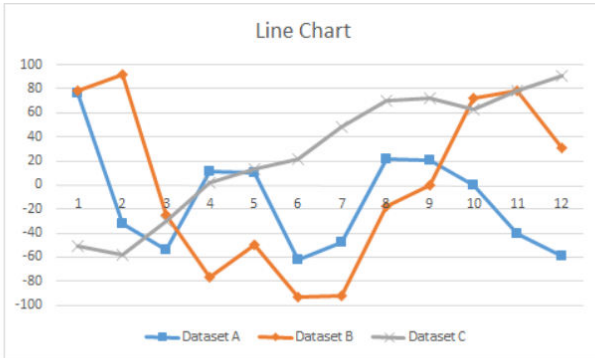
Correct

Introduction to Charts in Excel

TOTAL POINTS 2

1.

1 / 1 point



The Line Chart above shows the data trends for three different datasets. Which dataset has the highest values for the months in the 3rd quarter of the year (months 7, 8, and 9)?

- ○ Dataset A
- ○ Dataset B
- ◉ Dataset C
- ○ No data is shown for the 3rd quarter of the year

2.

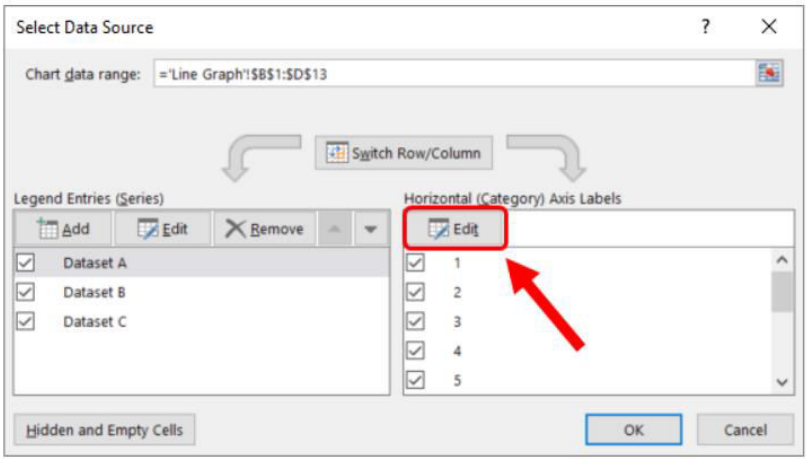
1 / 1 point

	A	B	C	D
1		Dataset A	Dataset B	Dataset C
2	Jan	76	78	-51
3	Feb	-32	92	-58
4	Mar	-54	-25	-30
5	Apr	11	-77	2
6	May	10	-50	13
7	Jun	-62	-93	22
8	Jul	-48	-92	48
9	Aug	22	-18	70
10	Sep	21	0	72
11	Oct	0	72	63
12	Nov	-41	78	78
13	Dec	-59	31	91

The Line Chart in the previous question was created using the data above. How could you update the Line Chart to use the month names (A2:A13) instead of numbers on the horizontal axis?

Right-click on the chart, choose “Select Data...,” and select:

◉



Select Data Source
Chart data range: ='Line Graph'!$B$1:$D$13
